SUBJECT	Design and Analysis of Algorithm
EXPERIMENT NO:	08
DATE OF PERFORMANCE	17/04/2023
DATE OF SUBMISSION	24/04/2023
AIM:	To use branch and bound strategy to solve 15 puzzle problem.
PROBLEM STATEMENT 1:	15 puzzle problem
ALGORITHM and THEORY:	 .If N is odd, then puzzle instance is solvable if number of inversions is even in the input state. 2.If N is even, puzzle instance is solvable if the blank is on an even row counting from the bottom (second-last, fourth-last, etc.) and number of inversions is odd. the blank is on an odd row counting from the bottom (last, third-last, fifth-last, etc.) and number of inversions is even. 3.For all other cases, the puzzle instance is not solvable.

```
PROGRAM:
                      #include<stdio.h>
                      int m=0,n=4;
                      int cal(int temp[10][10],int t[10][10])
                            int i,j,m=0;
                             for(i=0; i < n; i++)
                                   for(j=0; j < n; j++)
